for Industrial Applications**

THE

GSKI

KON

Our success is built on delivering high performing solutions and world-class support. Specialists around the world are prepared to provide support and keep your systems running smoothly.

RESEARCH & DEVELOPMENT

We understand the needs of modern manufacturing and strive to develop the most efficient systems possible. Our team is constantly developing innovative new solutions to better serve the needs of our customers and improve existing equipment lines.

IN-HOUSE MANUFACTURING

Kongsild's headquarters in Sorø, Denmark, is also home to our manufacturing facility and warehouse. We produce key machines and components for our systems in-house to ensure seamless integration and optimal performance.

CUSTOMER SUPPORT

It is our strategic goal to deliver outstanding customer support worldwide. We offer a complete range of services such as preventative maintenance performed by trained technicians, shipment of original spare parts, system repairs, and installations.

TECHNOLOGY CENTERS

Our Technology Centers in Denmark and the United States allow our customers to experience the power of air first-hand. Every system is unique, so we perform real-life tests of your materials to find the perfect custom solution for your production.

DIGITAL RESOURCES

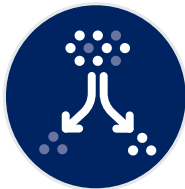

Access our entire library of digital resources anywhere, anytime. Browse products and applications, compare models, or download PDF documents, manuals, data sheets, spare parts lists, and more at kongsild-industries.com.

Industrial System Solutions

Delivering precisely engineered, expertly manufactured, customer-specific pneumatic conveying and material handling solutions.

It is our goal to provide customized pneumatic conveying solutions that can increase production speed, create efficient systems with less production stops, and ensure a safer working environment. We have installed thousands of energy-efficient pneumatic systems in factories on all continents, conveying granules, pellets, flakes, off-cuts, finished components, and more.

DEDUSTING & SEPARATION

Remove or reduce unnecessary dust and light impurities from re-processed material or plastic pellets. Significantly improves the quality and reusability of recycled materials.

- Dedusting of pellets or regrind
- Separation of recycled material

PNEUMATIC CONVEYING

Convey a wide variety of materials across your production in a contained system. Transport particles ranging from small-sized granules to pellets, plastic parts, and finished goods.

- Granules
- Injection moulded parts
- Blow moulded parts
- Flash and rejects
- Post-consumer recycling

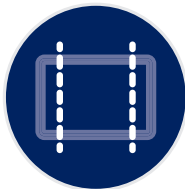

OFF-CUTS SYSTEMS

Collect and convey process waste while keeping production spaces clean. Powerful pneumatic solutions designed to keep up with the demands of a high-speed production.

- Skeletons & punch-outs
- Conveying off-cuts
- Conveying shredded material
- Tissue waste extraction

TRIM HANDLING

Optimize production capacity with efficient trim handling systems designed for paper, plastic, foil, and cardboard. Pneumatic systems are low maintenance and exceptionally quiet.

- Cut trim extraction
- Endless trim extraction

"We have built our relationship over many years, I'll have requests to change drawings and they accommodate; they totally focus on my needs."

Maintenance Manager,
Industry Leader of Direct Mail Solutions

"In my experience with Kongsilde, they have always been very, very thorough and they've been open to feedback. They have always provided good information and good service."

Project Manager,
Large Personal Care Product Manufacturing Company

High-Quality Products

A wide range of high-quality products designed to streamline production, free up space and make your production area safer.

We are continuously advancing our products and technical services to enhance process efficiency in the workplace. Kongskilde's proven equipment provides manufacturing facilities with an improved environment for safety that delivers customers a competitive advantage.

AND MORE

"We like the blowers because they have a unique product line. The MultiAir is really quiet. High end companies don't want noise and they seek products with noise reduction."

*President,
Leading Manufacturer of Innovative Bulk Material
Handling Solutions*

"I choose Kongskilde because of their product line. There aren't many companies that offer this variety in their product line. We find great success with their trim systems."

*President,
Global Plastic Equipment Company*

Industries We Serve

We simplify things for our customers. Whether it involves conveying materials like paper, plastic, or packaging, the recovery and recycling of waste, or the automation of manual processes, we can help.

ABOUT KONGSKILDE

Your trusted global provider of material handling solutions since 1949

Kongskilde Industries has unparalleled experience delivering precisely engineered, expertly manufactured, customer-specific pneumatic conveying and material handling products for the plastics, paper, packaging, and agricultural industries.

We're driven by the idea that the best work comes from a strong focus on technology and customization, communication, and adding value at every step of the process. From your very first conversation through assembly and installation, we make it our number one priority to provide world-class customer service.

Our legacy of innovation and passion for pneumatics spans more than 70 years and continues to accelerate with new technologies and bold ideas. With company headquarters in Denmark and sales offices in 9 countries around the world, we have the capacity and experience to truly think global and act local.

**Our Guarantee**

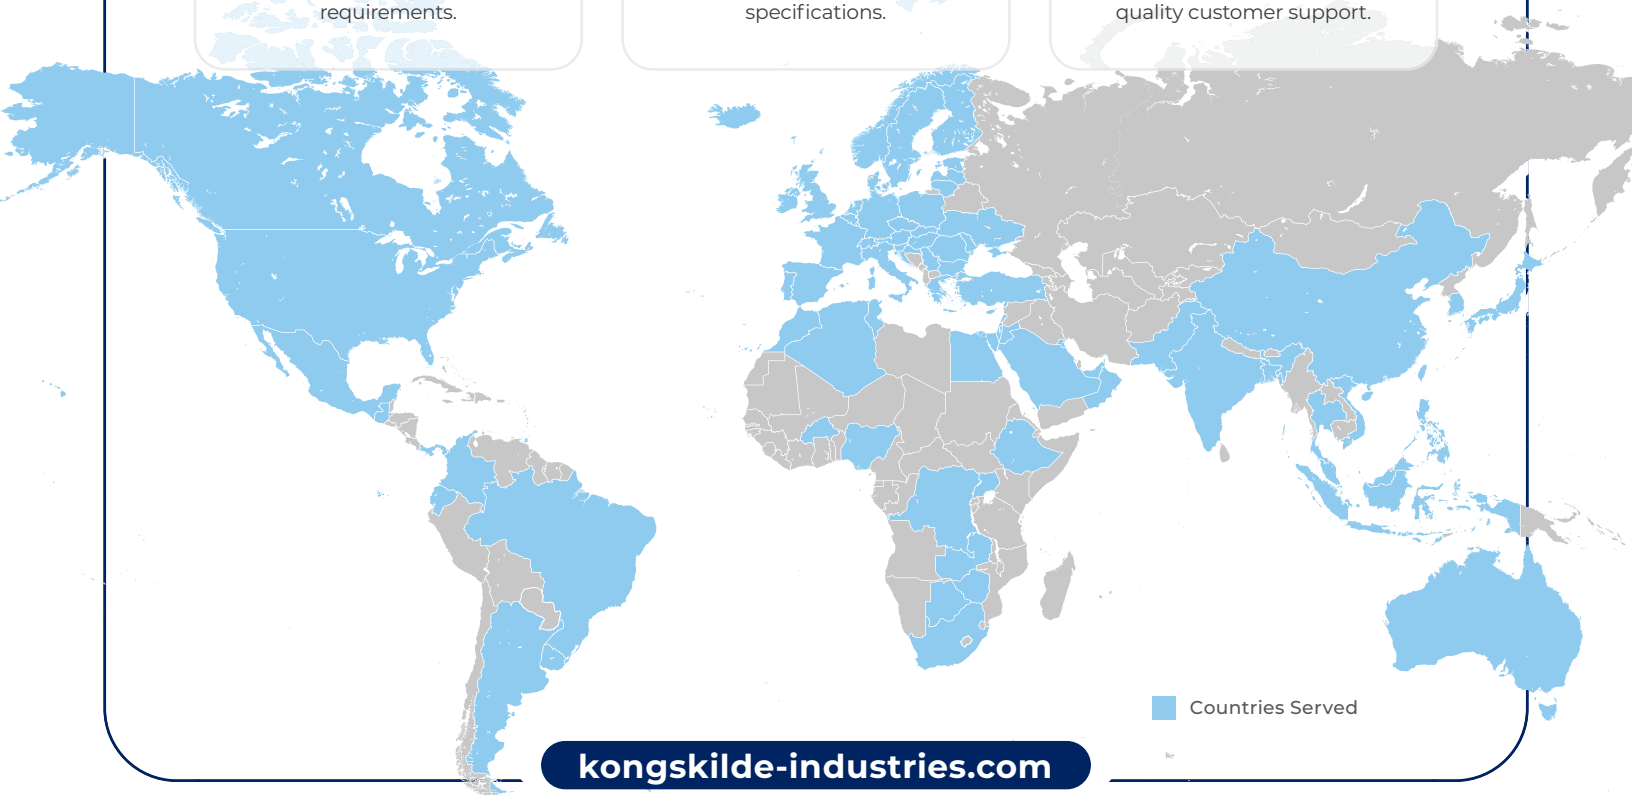

We guarantee that our equipment and custom-engineered systems will perform to your production requirements.

**Custom Engineering**

We specialize in custom-engineered systems crafted to meet your unique system specifications.

**Global Support**

Our systems are backed by a global team of technical professionals to provide high-quality customer support.
