

A large industrial machine, the Kongskilde Compact Unit, is shown in a room with white walls and a brick ceiling. The machine is primarily white with a dark blue top section and a dark blue side panel. The side panel features the Kongskilde logo (a stylized 'K' in a square) and the text 'KONGSKILDE Compact Unit' and 'www.kongskilde-industries.com'. A control panel with a red emergency stop button and a digital display is visible on the top section. A white pipe extends from the top of the machine. In the foreground, there is a blue metal frame with a white plastic bag hanging from it.

# Kongskilde Compact Unit

**Kongskilde All-in-One  
Compact Unit for Trim Handling**

# Quiet. Compact. Flexible.

Introducing the all-in-one Compact Unit for trim waste collection. A flexible, smart and portable solution for machine-side waste collection.

**Efficiently capture, condense, convey, and store trim waste.**

Collect waste directly from process machines and compress it for storage in a continuous bag. The simple and intuitive operation allows the user to adjust suction speed in a second.

✓ **Quiet operation**

✓ **Built-in filter**

✓ **Flexible placement**

## No Cutter Needed!

- Sound pressure level: Maximum of 80 dB(A) - at 1 meter distance.
- No need to maintain or replace knives/rotors.
- Improved safety conditions for operators.
- Cleaner working environment.

## Continuous Bag

- Bag expands up to 45 meters.
- The operator decides when to cut and remove the bag.
- Cut bags while your production is running and even mount new continuous bag.
- Bags are easily closed with strips.

## Innovative Design

- Fits through a standard door and can easily be moved by eg. a pallet jack.
- Built-in pre- and HEPA-filters let you recirculate the process air while simplifying the set-up of the unit. As an option, process air can also be expelled through a pipe. Requires an accessory kit.
- No anti-static equipment needed due to high airspeed.
- Intuitive built-in HMI panel.

### Lean Production

Streamline your production waste collection

### Plug-and-Play

Connect to your machine and start collecting

### Small Footprint

Compact design creates a small footprint

## Capture

Adapt directly onto machine

## Compact

Reduce volume of waste removed

## Transport

Pneumatic transport of material

## Filter

Built-in air filtration

## Collect

Continuous bag expands up to 45 m

## Store & Recycle

Remove bags to storage or recycling

# Worldwide Technical Support

At Kongskilde Industries we have specialists around the world who are prepared to provide support and keep your systems running smoothly.

Combined with over 70 years of invaluable experience within pneumatic systems, our skilled staff and engineers are ready to support you.

We offer a complete range of services such as spare parts, maintenance performed by trained technicians, preventive maintenance programs, and system repairs.

Start the conversation today and discover what the power of air can do for your business.
